

Numerical Reasoning Assessment

Report Name Julie Sample
Email/ID 123456
Date 07/07/2025
Test Version 1.0
eTicket number 2543268883074901288
Time 15:40:00
Time Taken 00:24:00

Overall Assessment Score

This overall score provides an indication of an individual's overall ability and fit for the target role. Scores on this scale are presented as percentiles. Percentiles range from 1 to 99, where the 1st percentile represents the lowest value (minimum), and the 99th percentile represents the highest value (maximum).

QUALIFICATION STANDARDS

The candidate featured in this report has been given a percentile score which can range from 1% to 99%. The percentile score indicates how well the individual performed in the Numerical Reasoning competency as compared to others who have taken this assessment. For example, an individual who scores in the 75th percentile, has scored better than 75% of all other candidates who have been scored.

Below you will find a breakdown of the Numerical Reasoning competency which provides further insight on its makeup.

NUMERICAL REASONING

Numerical Reasoning measures an applicant's ability to learn and follow procedures, skill in interpreting and analyzing numerical information to solve problems, and knowledge of mathematical principles and processes. Numerical Reasoning contains the following sub-constructs:

- Mathematics
- Information Ordering
- Processing Information
